09.00 – Departure from Kivi Turismitalu

9.15 – **Leiger LK OÜ** (Karu farm, Mustivere)

**Our** therapeutic mud development center is located in Mustivere village, Viljandi municipality. It is the heart and soul of everything we do. This is where medicinal mud is refined into many different products and new products are continuously developed and tested. The production starts with filtration and homogenization of the treated sludge and ends with the separation of the extract of humic substances in the laboratory and the production and packaging of various products from it. The production line also enables the drying and grinding of therapeutic mud.
